

Web developer

HiWi / Student assistant

Contact: Moritz Klischat (moritz.klischat@tum.de)

Our website <http://commonroad.in.tum.de> provides a benchmark for motion planning algorithms of automated vehicles. User can upload their solution to traffic scenarios, which are evaluated on our server. To further develop the website and prepare it for an international competition, we are looking for experienced and motivated website developers.

Requirements

Preferably, you have good skills in at least **two** of the following frameworks:

- React JS
- GraphQL
- REST
- Django
- NGINX
- Python
- Docker

We only employ students of TU Munich with at least three remaining semesters until graduation.

Offering

We offer challenging and diverse tasks and the possibility to bring in your own ideas. We offer flexible working hours up to 20h/week and you will mostly work from home with regular online team meetings. Bachelor earn 11,50€, Master students 13,40€ per hour.

Application

Please provide a CV and a link to a git repository or something similar showcasing your experience through email to moritz.klischat@tum.de.
