Jörg Ott

- TUM, CS, Chair of Connected Mobility
- Working on
  - Mobile connectivity and service platforms (Living Lab Connected Mobility)
  - Cloud transport and QUIC (EC H2020 SSICLOPS)
  - Internet for All: architectures and services (EC H2020 RIFE)
  - End-to-end measurements (fixed, mobile networks)
  - WebRTC real-time measurements (callstats.io)
  - Internet of Things without silos (and largely without clouds)
  - Mobility pattern inference and mobility modeling
  - Recommendation systems

Interests and questions

- Lessons (DTN, ICN, …) -> Internet

- Computation and storage at/near the edge IoT

- Application decomposition and service migration

- Implications for a "Distributed Internet"

- Future network access

- As for the MIR^3 retreat: continuous improvement
  - Scoping
  - Outreach
  - Planning well ahead
