marcus.brunner@swisscom.com

Key figures Swisscom

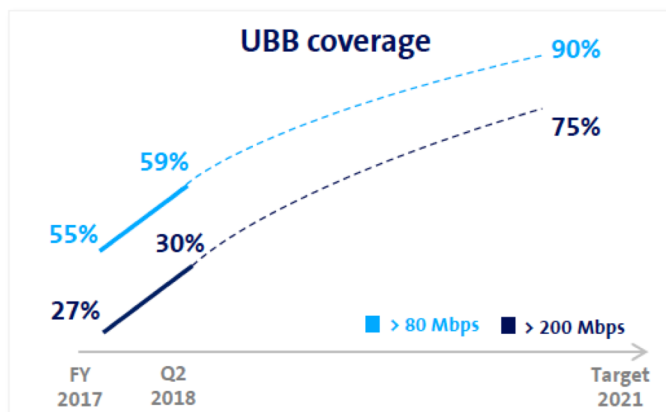

As of December 2017

Current Network

W+ network update

- > Technology mix key in bandwidth expansion

- > Currently ~3.37mn fibre connections o/w 1.39mn FTTH, enabling strong HD (>96%) and UHD (>83%) coverage for Swisscom TV

W- network update

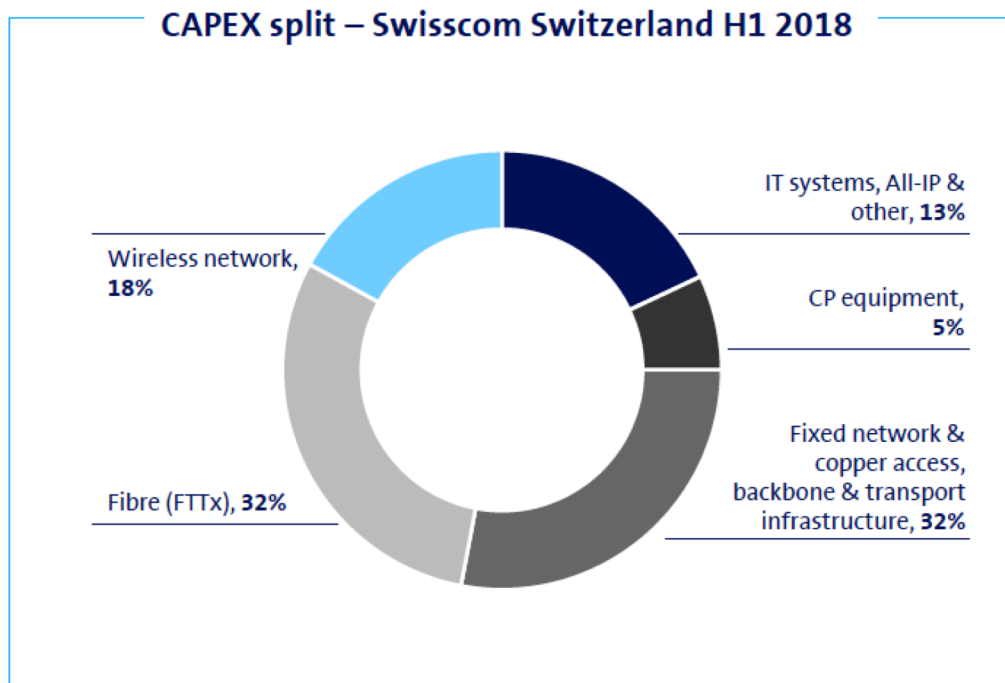

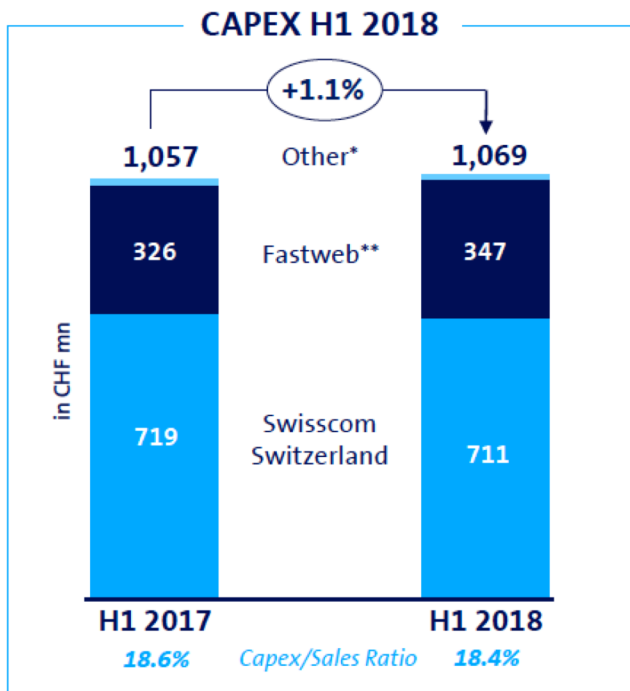

- > 4G+ with speed up to 1 Gbps
- > Download speeds over 800 Mbps are now possible for the 1st time
- > Extending technical lead of Switzerland's best network to offer the **best experience** with high-definition videos, gaming, virtual reality and lightning-fast surfing
- > Pop coverage: 99% 4G and >80% 4G+

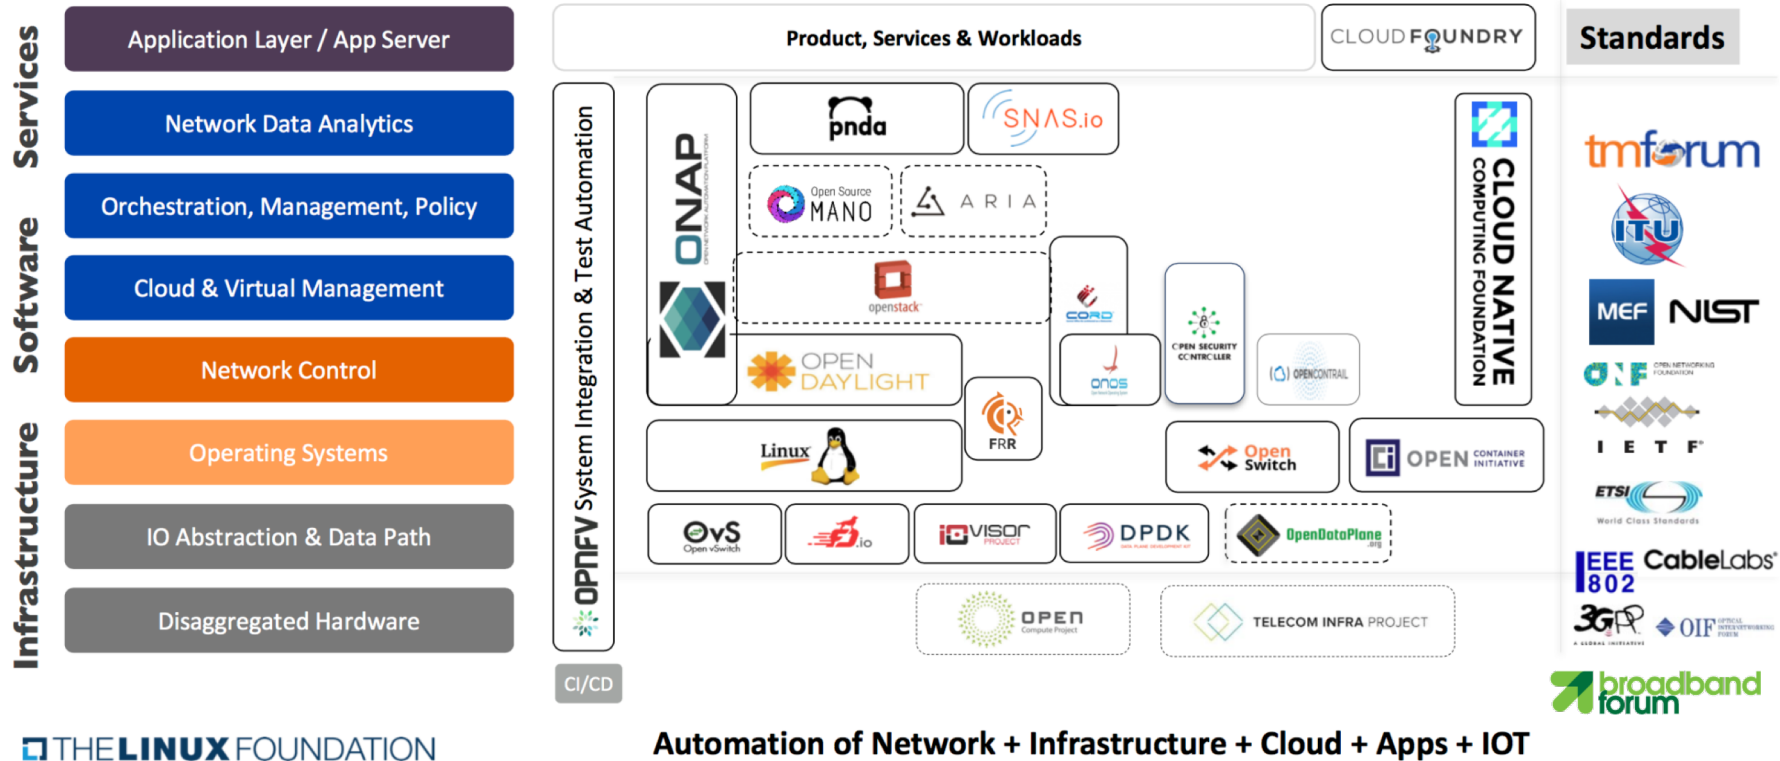

Issues

- > CAPEX
- > Market Penetration
- > 5G from initial deployment to new business
- > Customers
- > Simplification and Automation

Large CAPEX -> how to reduce?

CAPEX reduction through Open Source for collaborative development Incl. white box hardware

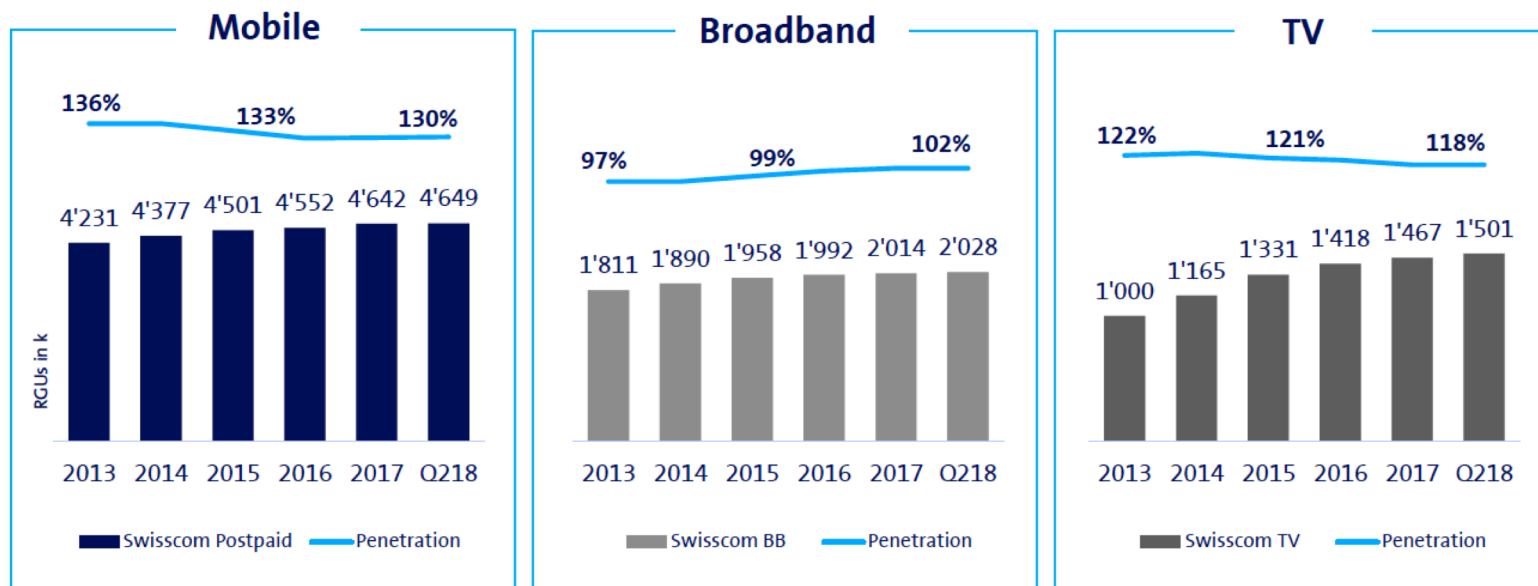

THE **LINUX** FOUNDATION

Automation of Network + Infrastructure + Cloud + Apps + IOT

Ref: <https://actionweek.tmforum.org/wp-content/uploads/2017/09/TMF-Keynote-LF-Networking-ONAP-Sept-2017-vfinal.pdf>

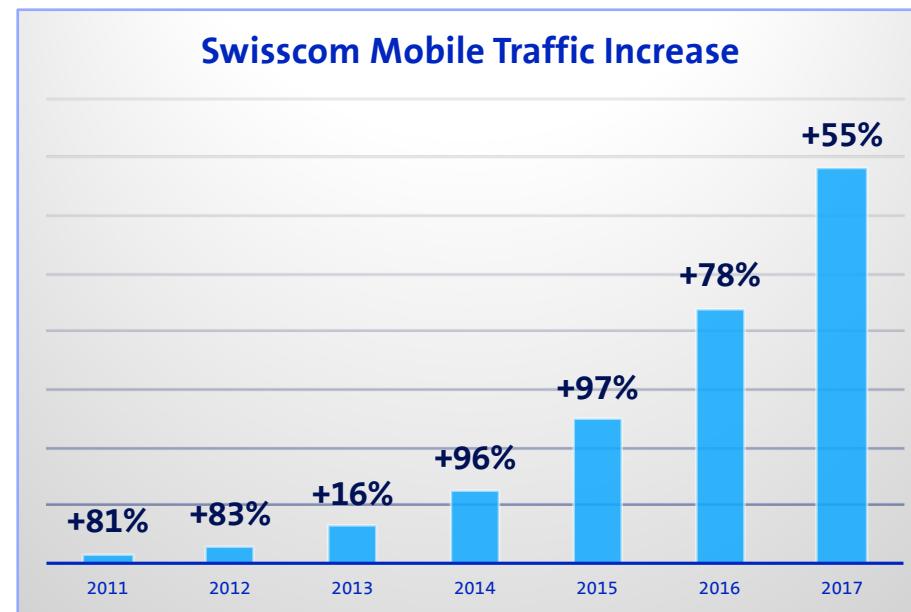

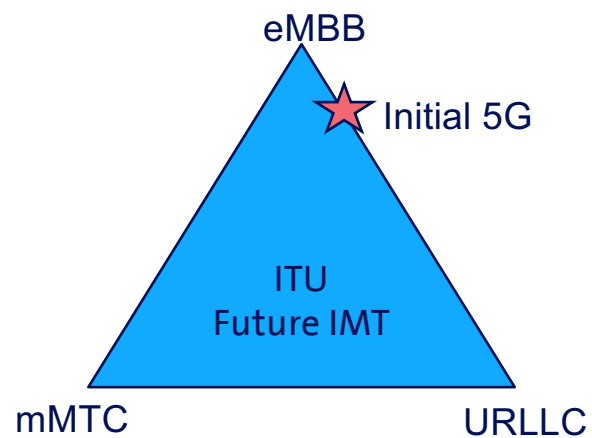

Market full penetration -> how to grow?

Initial 5G

- > More of the the same
- > Tackling the traffic growth
- > IoT through LTE or other technologies

<https://www.swisscom.ch/de/about/unternehmen/portraet/netz/5g.html>

New Businesses

- > B2B and B2B2C services
 - Reliability as a Service
 - Operation as a service
 - ICT as a Service
 - Solutions stitched from various components
- > Leverage new 5G capabilities
 - Radio features for ultra-reliable and low latency
 - Slicing for resource separation and service isolation
- > Willingness to pay extra?

Development of Digital Services

Today

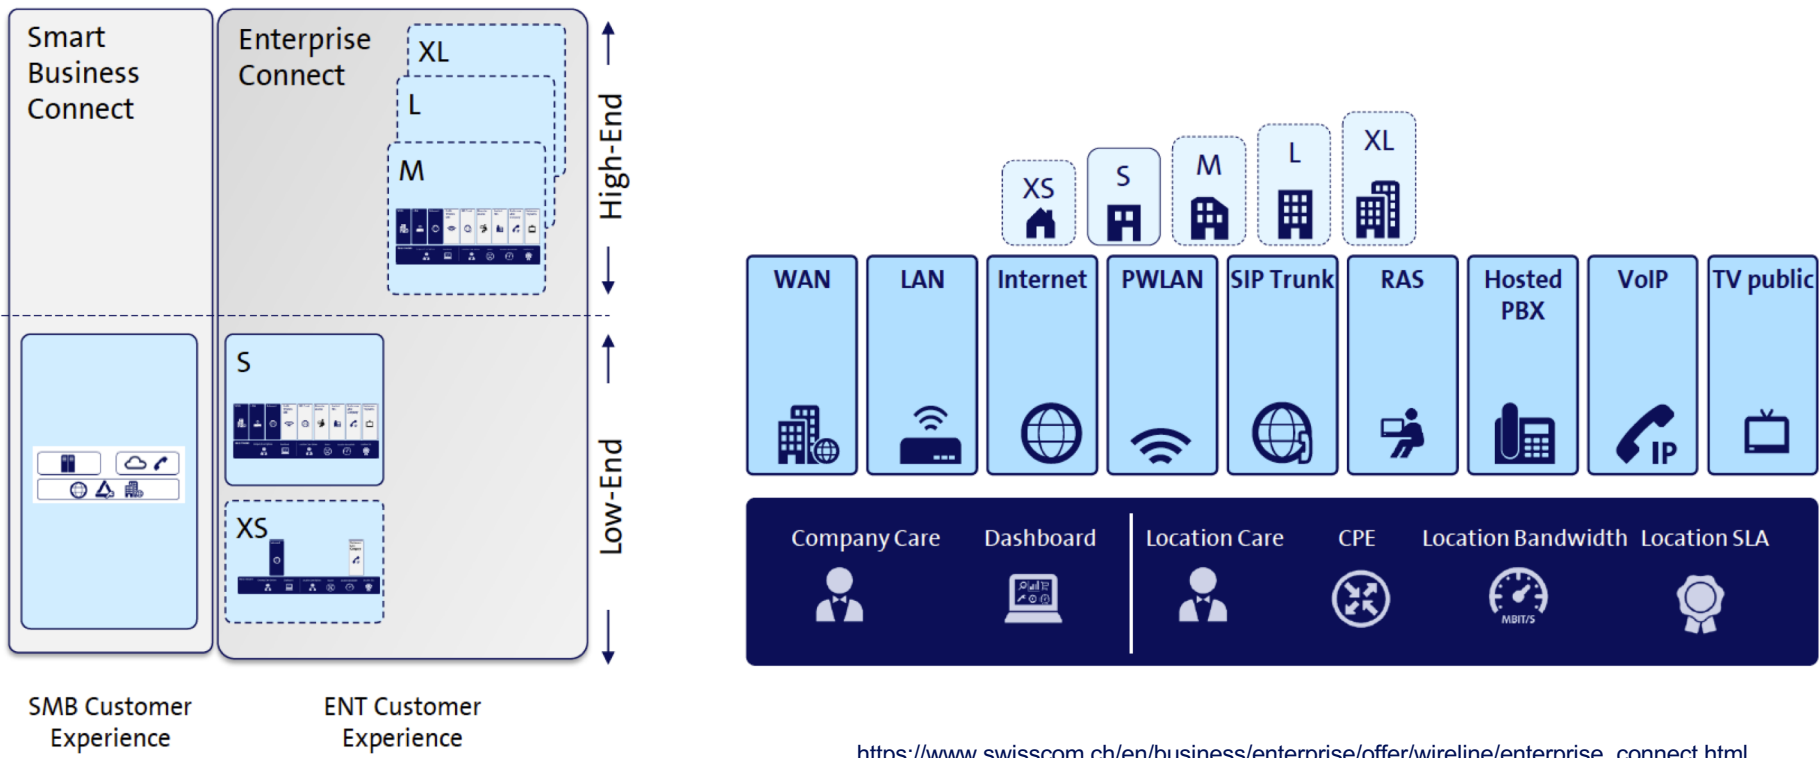

5G

Example: Enterprise Connect

Virtual Connectivity Services: self-care and on-demand

https://www.swisscom.ch/en/business/enterprise/offer/wireline/enterprise_connect.html

Operational Challenges of 5G

> Initial 5G

- Indoor coverage
- Measurement of electromagnetic radiation for new technologies, e.g. beamforming
- Benefits of higher-degree MIMO is deployment scenarios dependent (reflection)
- Regulation for Electro-Magnetic Emissions

> Reliable 5G network deployments

- Reliability being part of an SLA
- Large amount of different software components make management difficult
- Managing the Edge

How to keep the Consumers happy?

Decision making for Mobile contract in Switzerland

- Coverage
- Network Quality
- Voice Quality
- Cost

OPEX reduction through Simplification and Automation

No POTS anymore

Automation

Converged Offers

Lonely phone booth (makes 1.4 CHF per year)

Thank you
