

# Prof. Jens Grossklags, Ph.D.

TUM – Professorship for Cyber Trust -- <http://www.cybertrust.in.tum.de/>

**Design of Systems  
Mindful of Economic  
Incentives &  
Behavioral Factors**

## Talk tomorrow:

- Bug Bounty Platforms: Empirical Analysis and Economic Challenges

## Questions:

1. How to overcome misaligned incentives in security-relevant ecosystems? For example, can Blockchain help to incentivize security information sharing?
2. How to manage security in complex ecosystems (e.g., Android AOSP, vendors, carriers etc.) and how to democratize participation in large networks (e.g., social networks, China's Social Credit System)?
