Focus on AI and IoT in:

1. Connected Spaces
   - Intelligent Buildings - a combination of different equipment and technologies, such as building fabrics, spaces, services, and communication systems that are capable of controlling the whole system
     - Building Insights
     - Occupancy Insights
     - Digital Assistant
     - Indoor Navigation
2. Connected Vehicles
   - Optimizing Equipment with AI
     - Asset Health
     - Equipment Advisor
3. Connected Operations
   - Optimizing Operations with AI
     - Visual Insights
     - Acoustic Insights
