

Simon Bauer

About me

- bauer@net.in.tum.de
- PhD student at Chair of Network Architectures and Services, TUM

Research Topic:

- Active and passive measurements of network infrastructure

Poster Presentation:

- Scalable TCP Throughput Limitation Analysis in Real-Time

Interests/To discuss:

- (Large-scale) active measurements of network infrastructure
- Performance indicators of network connections and network infrastructure
- Passive measurements of traffic and network characteristics

- Public available data sets, e.g., packet traces
- Orchestration of measurements
- Trends in data centers
- Reproducibility
