

M.CSE. Vittorio Cozzolino
PhD student, TUM - Chair of Connected Mobility

Core Research Interests

Edge Computing System Architectures
Resource Virtualization and Hypervisors
Computation Offloading, Edge-Cloud Scheduling
Edge Computing and AI for Augmented Reality

Open Questions

1. How will edge computing affect the network infrastructure?
2. Which use-cases can benefit the most from edge computing?
3. Will edge computing play a dominant role for mobile AR/VR applications?
