About Me

Currently working student at R&S, Secure Communication.
Studying EE at University of Applied Sciences Munich.

Past Research

- Rohde & Schwarz: Networking with Rust: Concurrent high performance process tracing.

- Fraunhofer AISEC: Investigation of the Rowhammer-Bug, judging implementability and severity.

Topics for Discussion

- Severity of low level security issues like Rowhammer? Especially on Internet infrastructure as VServers.

- Intel Management Engine & Co.: Solutions for companies to administrate computer infrastructure remotely via network, entirely without dangerously complex firmware?

- Socket APIs with Foreign Function Interfaces in Rust.
