Research Question

Does edge computing makes sense **practically**?

Yes!

- How to make protocols work at edge?
- How to allow applications to use edge?
- How to bring consistency to diversity?

No!

- How to support emerging applications with cloud platform?
- How to plug in existing performance gaps in cloud computing?

Maybe?

How to answer questions for both
Yes! and **No!**
+
How to marry cloud and edge?
