

Thomas Schmidt

HAW Hamburg

Research Interests

- Internet protocols & standards
- Internet backbone routing
- Internet measurement
- Internet security
- Internet of Things

Background

- I escaped from Mathematical Physics to run Real Networks in the 90ies
- In the 2000s I turned to prefer theory again 😊

Research Questions

- How can we keep the Internet open and secure – even for tiny things?
- How can we disguise Internet consolidation actions and trends?
- How can we make networking research better reproducible and hence more trustworthy?

Our Open Source projects:

Spoki:

CAF

The C++ Actor Framework

RIOT
