Networking Services Team

Red Hat

- ▶ Technical debt
  - ▶ bridge netfilter, old eb,ip,ip6,arptables interpreters
  - ▶ old features that (probably) noone is using
  - ▶ code removal where possible/sensible
- ▶ Development work
  - ▶ nf tables / nft (the frontend tool to add filters, packet classification etc).
  - ▶ netfilter plumbing for ebpf/xdp
  - ▶ packet drop monitoring

## Open Questions

- ▶ any shortcomings in Linux that should be addressed?
