

Tim Betzer

About Me

- B. Sc. and M. Sc. Informatics @ TUM
- Started last year as PhD at the Chair of Network Architectures and Services

Research Interest

- Internet Measurements
- Emulating Internet Components
- Network Security

Tim Betzer

Poster: Scalability and Maintainability: Internet Measurements in a Testbed

Open Questions

- How can we design and evolve an infrastructure for internet measurements that remains scalable, reproducible, and sustainable over time?
- What approaches can ensure reliable data collection, storage, and analysis while maintaining flexibility, resilience and ethical responsibility?
- How can different network components of a single organization on the Internet be identified?
- Which and how much data is needed to accurately detect organizations?
