

Matthias Wählisch

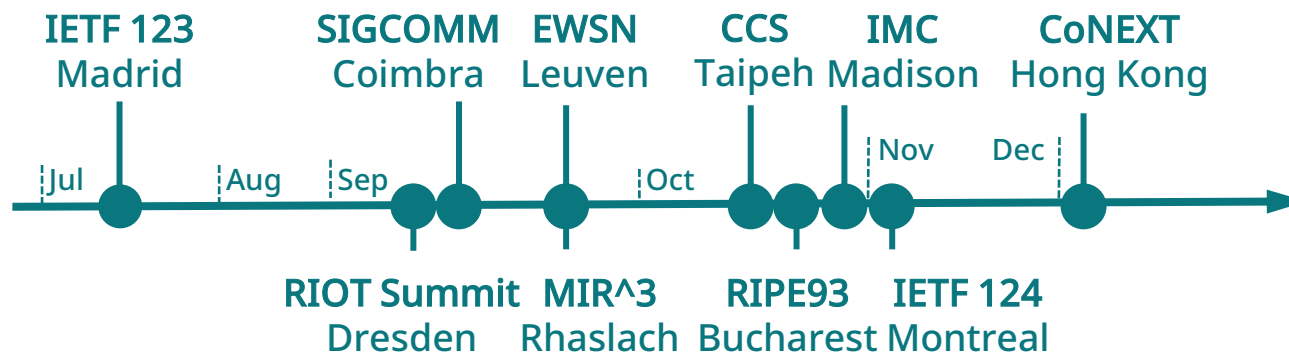

Design and evaluation of networking protocols and architectures

Internet measurements and analysis

Transforming solid research into practice,
trying to positively impact the lives of people

Chair of Distributed and
Networked Systems
at TU Dresden

Questions

What did we learn from >40 years of the Internet?

What can we learn for space communication?

How much goes wrong in QUIC?

Maybe Web people should not design transport protocols.

How should we design and operate Internet measurement infrastructures?

Solid insights require solid infrastructures.
